GFG Peabody

Custom Coating Equipment

engineered for your metal processing line

Roll Coater

Electrostatic Oiler

Reduce Waste

Improve Coating Consistency

Increase Uptime

Why
the most advanced metal processors use GFG Peabody

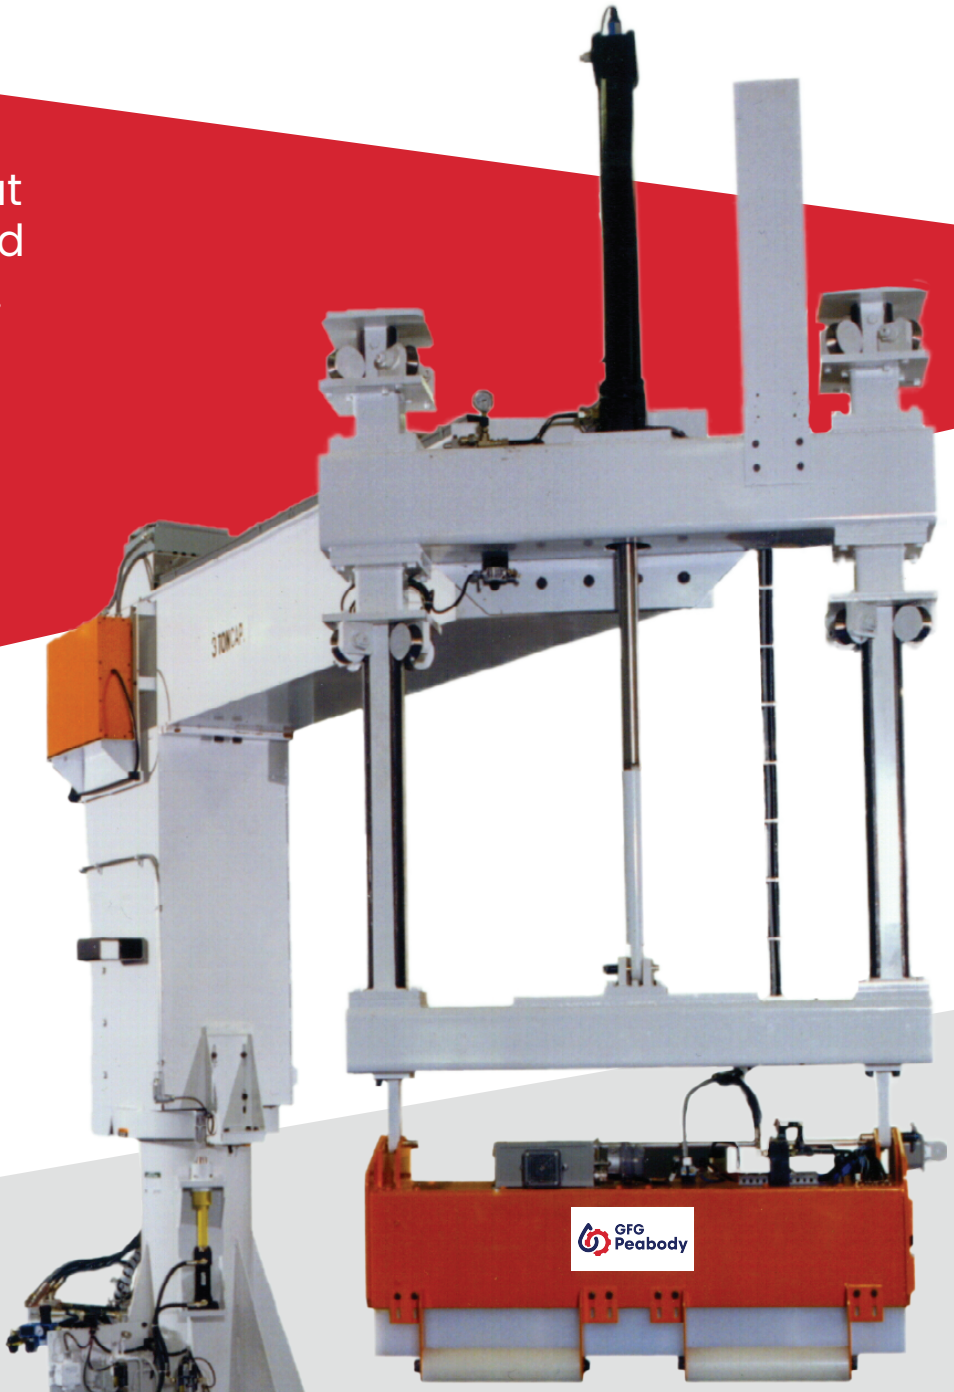

Custom Engineered for **your Line and Products**

Guaranteed Coating Performance

Parts and Service for the **Life of the Machine**

Working to give you what you didn't get before and can't get anywhere else.

We craft our machines ***differently.***

Challenge Us.

- Wasteful overcoating
- Streaks ruining the appearance
- Thin coatings causing rejects/corrosion
- Inconsistent performance
- Unplanned downtime
- Expensive maintenance
- Extended changeovers
- Outdated safety and guarding
- New coatings to introduce
- Too much strip contact
- Explosive solvent fumes
- Higher production speeds

GFG Peabody designs and manufactures custom roll coating and electrostatic oiling equipment for metal-processing lines worldwide. Our systems are engineered to improve coating consistency, control material usage, and support dependable production.

How we work

Define Your Requirements

We document strip, coating, speed, space, controls, safety, and integration requirements.

Approve the Concept

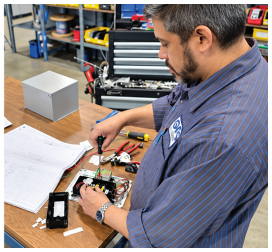

You review the equipment layout, interfaces, operating concept, and site requirements before detailed engineering.

Engineer the System

Our mechanical and electrical teams develop the complete machine and controls package.

Build and Test

The system is assembled and functionally tested at our facility near Milwaukee, Wisconsin.

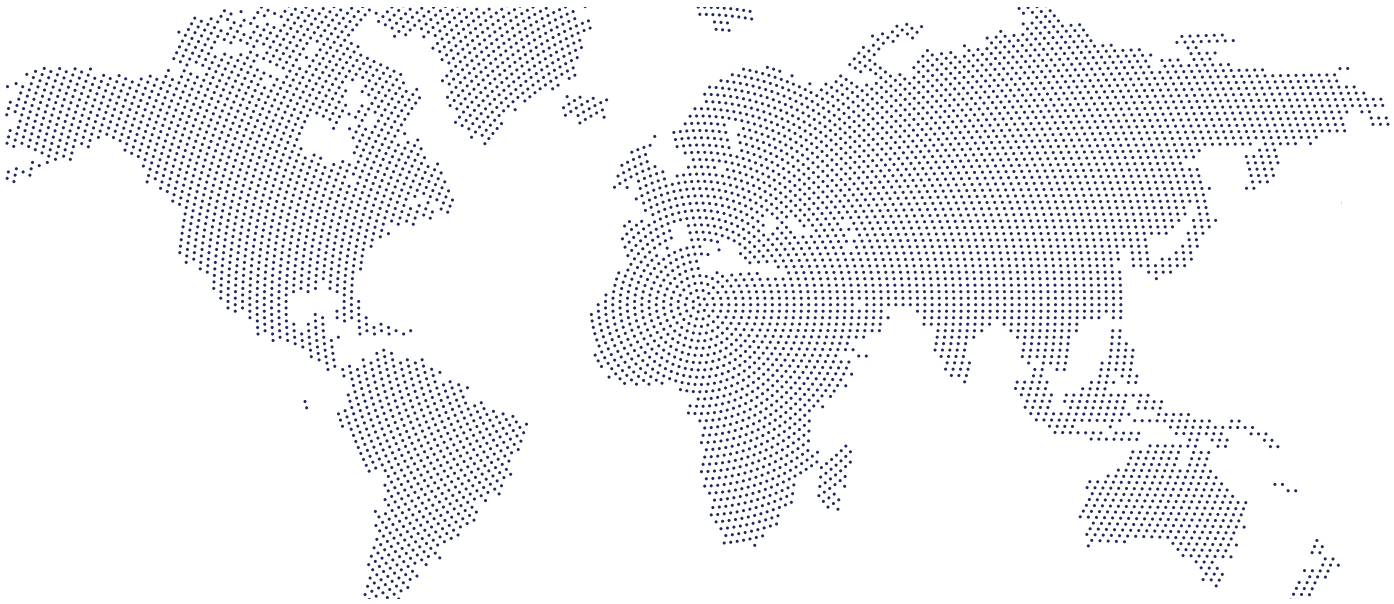

Install/Startup/Training

Our technicians support installation, commissioning, operator training, and ongoing service.

750+
Roll Coaters in
over 50+ countries

600+
Electrostatic Oilers
in over 30+ Countries

Metal Processing

with GFG Peabody Equipment

Coil Lines

Coil Coating
Galvanizing Lines
Blanking Lines
Pickle Lines
Tension Level Lines
Slitting Lines
Skin Pass Mills
Cold Rolling Mills
Tinplate Lines
Electrical Steel Lines
Recoil Lines
Inspection Lines
Cut-to-Length Lines

Coatings

Solvent Based Paint
Acrylic Clear Coating
Corrosion Prevention Oil
Wet Pre-Lubrication
Dry Lubrication (Wax)
Chemical Pretreatments
UV/EB Cured Paint
Slurry Coatings
